

Pretrsla nas je novica, da je Slovenija od vseh držav, ki so 1.5.2004 vstopile v EU, po 20-ih letih v EU, najbolj zaostaja. Nekdaj daleč najbolj razvita, ki je države vzhodnega bloka upravičeno gledala z viška, je obstala v času. Celotri baltske države, ki so bile 46 let pod najtršim komunističnim režimom SZ, nas prehitevajo. Slovenija je imela leta 1991 najboljšo štartno osnovo, zato zunanji opazovalci ne razumejo, kaj se nam dogaja. Vedno bolj je vidno, da ima Slovenija zvezane "roke in noge". S plenilsko-mafijskimi okovi je vkljenjena na jugoslovansko-komunistično preteklost. Ujeta, se težko prebija na svetlo. To seveda ne velja samo za gospodarstvo, pač pa za vse družbene plasti, vključno z državnim šolstvom in znanostjo. Protislovenski duh vpliva tudi na zgodovinske raziskave o slovenstvu, ki so popolnoma zastale. Na udaru je celo slovenski jezik, temeljna vrednota naše državnosti in starodavne Evrope. Razlog za takšno stanje so neformalne kriminalne strukture, ki so se pretihotapile v demokratično družbo. Te so že v Jugoslaviji delovale za uničenje slovenstva. Danes vplivajo na skoraj vse pore družbe. Izven paraliziranih udov pa neodvisnih raziskav ne morejo preprečiti. Ta Zbornik je dokaz, da s ponosom utiramo pot slovenski in evropski znanosti ter rešujemo njeno čast.

We were shocked by the news that of all the countries that joined the EU on 1/5/2004, Slovenia is lagging behind the most after 20 years in the EU. Once by far the most developed, which rightly looked down on the countries of the Eastern Bloc, is now halted in time. Even the three Baltic countries, that were under the harshest communist regime of the SU for 46 years, are overtaking us. In 1991, Slovenia had the best starting position, so outside observers cannot realize what is happening to us. It is increasingly visible that Slovenia is tied all over around. It is chained to the Yugoslav communist times with predatory-mafia shackles. Trapped all down, it is hard to break towards the light. Of course, this does not only apply to the economy, but to all social layers, including public education and science. The anti-Slovene spirit affects also historical research of Slovenekind, which has completely stalled. Even the Slovene language, the fundamental value of our statehood and ancient Europe, is under attack. The reason for this situation is informal criminal structures that have infiltrated into a democratic society. Serbian intelligence service, covered behind Yugoslav Army, worked for the destruction of Slovenes already in the former regime. They affect almost every pore of the present society. However, they cannot prevent independent research outside the paralyzed systems. This Proceedings is proof that we are proudly paving the way for Slovene and European science and saving its honor.

ZBORNIK

16. in 17. mednarodne konference
KORENINE SLOVENOV IN EVROPEJCEV

PROCEEDINGS

of the 16th and 17th International Topical Conference
ORIGIN OF SLOVENES AND EUROPEANS
