

Neodvisnost znanosti je stanje v katerem posameznik lahko prosto raziskuje resnico in izsledke objavi v pomembnih javnih glasilih. Ko pomembno vlogo dobi laž, resnico pa se aktivno onemogoča, potem vemo, da imunski sistem družbe že obvladujejo paraziti. To je stanje današnje družbe. Rakaste celice so prevzele kontrolo nad tokom informacij. Sedaj te rakaste tvorbe uničujejo zdrave celice. SSK-ju (Slovenski svetovni kongres) v katerem so potekale številne prireditve pomembne za slovenski rod iz vsega sveta, so leta 2018 na najgrši način najprej onemogočili delovanje, nato pa vrgli iz prostorov nad trgovino Nama. Na novi neugledni lokaciji izven centra Lublane, so vodstvu SSK prepovedali izvajati kakršnekoli prireditve, čeprav prostori to omogočajo. Kaj nam izpostavljena situacija izdaja? Pove nam, da družbo obvladujejo protislovenski paraziti, ki želijo utišati slovensko besedo in slovenstvo izriniti na obrobje države, ki se ji reče Slovenija. Prešeren je zapisal: »*Manj strašna noč je v črne zemlje krili, kot so pod svetlim soncem sužni dnovi.*« Kako se znebiti rakaste tvorbe? Vprašajte kirurga na onkologiji.

Independence of science is a free state in which any educated person can research without restriction and is allowed to publish results in significant public media. When lies are being forced intentionally, while the truth is being actively restricted, we know that parasites control society's immune system. We can find nowadays society in such a state. Cancer took control of the flow of information. Now that cancer formation is destroying healthy cells. SSK (Slovene World Congress) which held many important events of great importance for Slovenes all around the Globe, was disabled by parasites. In 2018, that evil creature prevented SSK from working normally; after that, they succeeded in throwing them out of their office. In a new disreputable location, out of the center of Lublana, the management of SSK was forbidden to hold any public event, even if rooms are suitable enough.

What does the exposed situation reveal to us? It tells straightly that the Slovene society is being controlled by parasites, who want to shout down the Slovene speech and push out the Slovenekind on the periphery of the state, which is native of the Slovene language. The Slovene greatest poet Prešeren wrote: »*Less fearful is the night in black earth's womb Then days of slavery here beneath the sun.*« How do get rid of cancer formations? Just ask the oncology surgeon.
